

Serial No. 09/527,350

REMARKS

By this Preliminary Amendment, the specification and claims have been amended to improve the grammar and to correct typographical errors.

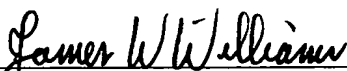

In order to be consistent with the amendments made above wherein "demodulating" has been replaced with "light-adjusting", a Request For Approval Of Proposed Drawing Change with regard to Fig. 18 is being filed concurrently herewith. This change is supported by lines 4-9 of page 27, which state that the quantity of emitted light is controlled by a signal from the circuit 304. Accordingly, no new matter is involved.

This Amendment does not increase the total number of claims, does not increase the number of independent claims, and does not present any multiple dependency claims and thus, no fee is required. However, if a fee is required, please charge any fee (other than an issue fee) required

Serial No. 09/527,350

during the pendency of this U.S. patent application to
Sidley & Austin's Deposit Account 18-1260.

Respectfully submitted,
